## LAKSHITA DODEJA

lakshita.dodeja@gmail.com | +1 (470)-815-2054 | https://lakshitadodeja.github.io/website/

#### **EDUCATION**

**Georgia Institute of Technology** 

Atlanta, USA

Masters in Computer Science, GPA: 4.0/4.0

(Aug' 21 -Present)

Specialization - Computational Perception and Robotics

National Institute of Technology (NIT)

Kurukshetra, India

B.Tech. (Hons) Computer Science, GPA: 9.35/10

(Aug' 14 - May' 18)

Graduated as one of the top 10 students in the department

#### **PUBLICATIONS**

- 1. Pradyumna Tambwekar, Nathan Vaska, Lakshita Dodeja, Matthew Gombolay (2022). A Computational Interface to Translate Unstructured Commander's Intent into a Machine Readable Specification (Under Review)
- Palak Garg, Lakshita Dodeja, Priyanka, Mayank Dave (2019). "Hybrid color image watermarking algorithm based on DSWT-DCT-SVD and Arnold transform." Advances in signal processing and communication. Springer, Singapore, 2019. 327-336.

#### RESEARCH EXPERIENCE

#### Graduate Student Researcher, Advisor: Dr Matthew Gombolay, Georgia Tech

(Aug' 21 - Present)

Studying Human Preferences for specifying strategies

- Currently leading a user study to understand how humans like to specify and come up with strategies
- This highly comprehensive study will span across ~100 participants

Extracting Goals and Constraints from Strategy descriptions

- Worked on a project to convert natural language strategy to goals and constraints for board game RISK using various NLP concepts including seq2seq architecture and transformers
- Our Natural Language Model performed significantly better than Humans in inferring intent

# Undergraduate Researcher, Advisor: Dr Mayank Dave, NIT Kurukshetra

(Aug' 17 - Apr' 18)

- Digital Image Watermarking
  - Developed a new algorithm for digitally watermarking colored images using Discrete Stationary Wavelet Transform (DSWT), Singular Value Decomposition (SVD), Discrete Cosine Transform (DCT) and Arnold Transform
  - Published paper "Hybrid Color Image Watermarking Algorithm Based on DSWT-DCT-SVD and Arnold Transform" in Springer

Wireless Sensor and Actor Networks

- Simulated an energy-efficient rekeying mechanism for clustered WSAN and compared it with Sequence Based Key Management Scheme (SKM)
- Energy consumption of key refresh operations also dropped by 34% in single-hop networks and 10% for multi-hop networks

## **WORK EXPERIENCE**

# **Graduate Teaching Assistant, Georgia Tech**

Atlanta, Georgia

Course - Robot Intelligence and Planning

(Jan'22 - May'22)

Grading assignments and clearing doubts for a class of 100 students

# **Amazon Development Centre**

Bangalore, India

Amazon Prime Verification Team Software Development Engineer - II

Plug and Play Verification

(Oct'20 - July'21)

- Developed plug and play widgets for customer segment verification throughout Amazon.
- Designed a generic and reusable flow of providing the verification widgets to the customers

# **Software Development Engineer - I**

(Jun' 18 - Sep'20)

- Veteran Identity Realtime Verification
  - Led the development of a real time veteran identity verification software for veteran day
- Integrated our system with a third party for verifying data and performed various performance and load tests Manual Document Verification
  - Conceptualized, designed and developed a process for manual document verification
  - Configured secure storage of documents, structured the Data Access Object and built the flow for Customer Service Agents to verify the documents

## **PROJECT EXPERIENCE**

•	Trained agents using Language and Vision Conditioned Imitation Learning on BabyAI to achieve better	(2021)
	performance than FiLM for more complex levels	
•	Developed a NLP model to detect social biases in language using reddit and twitter data	(2022)
•	Developed a NLP model to predict if an argumentative essay was effective in its writing	(2022)
•	Study on adversarial attacks and defences for monocular depth estimation	(2021)

Languages Skills - Python, C, C++, Java, Perl, HTML, Javascript, SQL
